The Parts Of A Plant

Written By Greg Smedley-Warren
Smedley’s Smorgasboard of Kindergarten

flower
leaf
stem
roots
These are the roots. The roots are like a straw. The roots drink water from the dirt.

The roots are under the dirt and help hold the plant in place.
This is the stem. The stem brings water to all of the plant.

The stem helps hold the plant up so it does not fall over.
These are the leaves. The leaves catch sunlight.

The leaves use the sunlight to make food for the plant.
This is the flower. The flower makes seeds to make new flowers.

The flower is pretty so bees and butterflies will visit. They take the seeds to make new flowers.
